

FOR SALE BY ORIGINAL OWNER

1962 TR4

The car was purchased new in British Columbia in 1961 and driven for a number of years before being stored. The restoration was started about 2021. The mechanicals, engine, running gear was completed by RWM & CO at Boundary Bay Airport. The car then went to Victoria where the body was fully restored. This is a rust and filler free car. There are 100s of pictures detailing the work done. This private body shop has restored multiple cars for us in the past and all have won many awards at car shows.

The car has steel wheels on it, but has the splines to convert it to wire wheels. Most of the parts to complete the car are with it. It will need final metal finishing and fitting, including a wiring harness, paint, new tires, convertible top and assembly. There are two roll bars for the car and it would make a very successful vintage racer. The most difficult part of this restoration project has been completed. The car even comes with the original TR4 Owner's Manual.

Due to the original owner's ongoing health issues, we are not able to finish this project, much as we would like to. We are asking \$29,000.00 for the car, which is way less than we have invested to date.

Please contact Bob and Elizabeth Smith if you would like to see pictures of the restoration at:
